SUMMARY

Dynamic Full Stack Developer with a strong commitment to continuously expanding and refining a diverse range of software development skills. Proficient in C#, Python, React, and Kotlin, I have effectively translated consultancy requirements into innovative technical solutions.

WORK EXPERIENCE

Full Stack Developer   **Oct 2023 - Present**

IDEMIA Singapore
- Conducted comprehensive integration tests across four devices to ensure smooth functionality.
- Performed extensive API testing with tools like Swagger and Postman, emphasizing JSON data accuracy.
- Developed a mobile application to effectively illustrate workflow concepts during tender demonstrations.
- Conducted five client demonstration workshops to showcase technical solutions.
- Executed on-site testing at client locations to verify that all test cases were met.

Application Developer   **Aug 2022 - Apr 2023**

Accenture
- Debug and troubleshoot any issues in the backend API, analyzing logs and working with the
- development team to isolate the root cause of problems.
- Tested the APIs using JSON on Swagger and Postman.
- Write efficient database queries using LINQ.
- Help team members achieve the common goal of delivering tasks on time
- Enhance existing API, suggesting possible solutions that could help the system's performance.

Business Analyst   **May 2021 - Aug 2021**

- Tested core functionalities in the system and provided prompt feedback to the development team that
- ensures function readiness.
- Liaised with functionals to clarify uncertainties and to ensure the best quality product is delivered.
- Prepared key documentation that enhances the traceability of project testing progress.

EDUCATION

Bachelor (Hons) Computing Science   **Sep 2020 - Sep 2023**

Singapore Institute of Technology
- Grade: Second Upper Class Honours
- Awards: The Ngee Ann Kongsi Scholarship 2022 and 2023

Diploma in Business Application   **Apr 2016 - May 2019**

Republic Polytechnic
- Award: PolyFinTech100 - NETS Most Innovative Payment award
